

14th International Conference on Structural Analysis of Historical Constructions

“Heritage conservation in the digital era”

The digital era presents vast opportunities for safe, efficient, and sustainable conservation when coupled with a profound comprehension of the material, structural and architectural characteristics of the built cultural heritage.

Join us to address the multifaceted challenges and to develop innovative methodologies and materials pertinent to the study and conservation of heritage structures.

Key dates

Abstract submission: 15/09/2024
Paper submission: 01/03/2025

Topics

- Digitalization for documentation and management
- History of construction and building technology
- Numerical modeling & structural analysis
- Vernacular / 20th c. built heritage
- Seismic vulnerability & risk
- Climate change: adaptation & mitigation
- Repair, retrofit & sustainable restoration
- Inspection methods / structural health monitoring

Organising Committee

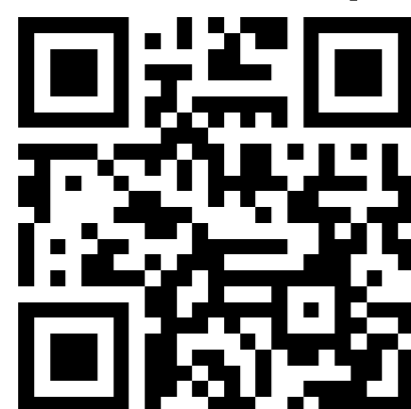

Savvas Saloustros, EPFL
Katrin Beyer, EPFL

Advisory Committee

Paulo B. Lourenço, University of Minho
Pere Roca, Technical University of Catalonia
Claudio Modena, University of Padova
